Career Objective

Computer Engineering undergraduate with strong OOP and DSA foundations, experience building full-stack applications and ML systems, seeking a Software Engineering Internship to design, build, and test reliable software at scale.

Education

Ramrao Adik Institute of Technology, D.Y. Patil Deemed to be University — Aug 2023 to Present
B.Tech Computer Engineering, Minor: Data Science, CGPA: 7.37/10 — *Navi Mumbai, Maharashtra, India*

Choudhari Madhukar Junior College — Jun 2021 to Jun 2023
HSC, Score: 50.67% — *Bhiwandi, Maharashtra, India*

N.E.S.'s English Medium High School — Jun 2020 to Jun 2021
SSC, Score: 72.00% — *Bhiwandi, Maharashtra, India*

Projects

Multi Modal Pharmacogenomic AI
Python, XGBoost, Logistic Regression, NLP, Machine Learning

- Integrated 52 pharmacogenomic datasets including PharmGKB pathways, IGSR samples, and single cell data to analyze Major Adverse Cardiovascular Events across 1,250 patient records.
- Built and evaluated ensemble models using LinearSVC, Logistic Regression, and XGBoost for predictive classification.
- Applied NLP, GridSearchCV, 5 fold cross validation, feature engineering, and explainable AI to improve model performance from 14% to 71%.

Helping Hands
Node.js, Express.js, JavaScript, HTML, CSS

- Built a full stack community platform integrating blood donation, blood bank, electricity services, and utility management.
- Developed REST APIs for donor registration, donor search, bill estimation, and structured data processing using Node.js and Express.js.
- Implemented filtering, validation, data processing, and Git based development for reliable application workflows.

Scheme Analysis App
Java, Data Analysis, Team Leadership

- Led a 3 member team to develop a platform covering 50+ government and private welfare schemes.
- Implemented filtering based on income, age, and eligibility using arrays and hashmaps for efficient scheme discovery.
- Developed the website and filed for copyright registration with the Government of India.

Leadership & Campus Involvement

Computer Society of India (CSI RAIT) — Aug 2024 to Present
Chief of Research and Development — *Jul 2026 to Present*

- Lead research initiatives, project conceptualization, and technical activities while guiding students in research and development.
- Mentor peers on technical projects, research practices, and problem solving approaches.

Computer Society of India (CSI RAIT) — Aug 2025 to Jul 2026
Research Head

- Coordinated student and faculty teams for research activities, technical learning, and project development.

Computer Society of India (CSI RAIT) — Aug 2024 to Jun 2025
Technical Team Member and Debugging Expert

- Resolved 15+ software issues and supported digital tools for 3+ technical events.

Training

TechSaksham — Dec 2024 to Jan 2025
Microsoft & SAP, Edunet Foundation — *AI, Data Analytics, Industry 4.0*

- Completed AICTE recognized training covering Artificial Intelligence, Data Analytics, and Industry 4.0 technologies.

Technical Skills

Programming: Python, SQL, Java, C, C++, JavaScript
Machine Learning and Data Science: PyTorch, XGBoost, scikit learn, Logistic Regression, LinearSVC, Model Evaluation, Cross Validation, Feature Engineering, NLP, Explainable AI, Data Analysis
Generative AI and AI: AI Agents, Agentic AI, Google ADK, Gemini API, Prompt Engineering, Multi Agent Workflows, Responsible AI, Output Validation, Bias Awareness
Data and Systems: Data Processing, REST APIs, JSON, Structured Data, Multimodal Learning
Web and Core: HTML, CSS, Node.js, Express.js, DSA, OOP, Git, GitHub, Critical Thinking, Research

Certifications

Google: AI Agents with ADK, Prompt Design in Vertex AI, Multi Agent Workflows with Gemini, Generative AI Academy
Google Cloud and Hack2skill: Engineer AI Agents with ADK, Make Agentic AI Work for You
IBM: Agentic AI, Introduction to Data Science
Harvard: CS50's Introduction to Programming with Python
edX: Data Science
